

SERVICE INFORMATION IMPORT GUIDELINES

1. Prepare Word document with given fields format like [| |Title| |], [| |Description| |] etc. Please refer sample document format linked in MDM under Service Information Import tile
2. Please start content in next line after field format

Note: You may add more fields in word document in similar formats as per Service information channel in IM. Please provide complete list of fields which will be used in word document so that we can configure these fields in MDM for data update.

3. Please DO NOT USE following things in word document:
 - a. Justify alignment
 - b. Shape formats
 - c. Do not use left or right indent on table in word document. User can use text alignment with in table but not indent. For example:

- d. Without gap in between two images
- e. Grouping on Images. For example:

4. Import the prepared word document in MDM – SERVICE INFORMATION IMPORT TOOL

5. MDM will schedule a job. Once the job is completed successful, please verify the document in IM

Note: After word document content migration into IM document, please verify the document in IM. User may require minor adjustment in imported content which can be done manually by user in IM directly.
